

Interim Executive Program

CHANGING BUSINESS DYNAMICS

The recent economic shift has created a need for leaner, more productive organizations that hold the ability to react and adapt quickly to a rapidly changing marketplace. The continuing economic uncertainty, as well as the emergence of “baby boomer” retirement, has resulted in PeopleFirst HR Solutions’ development of the Interim Executive Program.

Our Interim Executives are experienced leaders who are hired for short periods of time to accelerate growth, temporarily fill a leadership vacancy, or to solve a key business issue. They consist of former leaders from several industries and organizations with specialized skills, knowledge, and experience that are very capable of enhancing your organization.

Business leaders are finding that Interim Executives can be essential during critical periods of a company’s life, including the stages of start up, turnaround, growth, or internal change. This program delivers leadership solutions in a staffing model that is both flexible and cost effective –and is becoming the strategy of the future.

ENHANCING ORGANIZATIONAL SUCCESS

Use our Interim Executives to make tough decisions efficiently, implement new processes effectively, take advantage of deep and broad business experience, save on upfront training & orientation costs, drive key initiatives, or overcome critical issues.

We can supply expertise & leadership in sudden loss of senior executives, implementation of a new corporate strategy, expansion into a new market, change and crisis management, recovery of failing programs, organizational restructuring, and so much more.
